How Secure are your PASSWORDS? Do you have "Post-its" surrounding your monitor?

Browser tools have gotten sophisticated enough to assist in storing and alerting you of compromised passwords...

- 1) Chrome - settings, passwords, Autofill, Check Passwords
- 2) Edge - settings, passwords. xxx Saved passwords, sort by "Health"
- 3) or better yet, use a password manager like the one I do: **ROBOFORM** (Only remember 1 MASTER password!)
 - a. Integrates easily into existing Browsers.
 - b. www.Roboform.com, sign up for 14 day free trial, when ready to purchase, get 6 months free added to your subscription when ordering through my website:

- i. www.sesolutionsny.net, Support Tools, scroll down...

Make your life Easier with the Top Rated Password Manager available! Get 6 months free added to your subscription when you order through this link!

- c. One account is accessible on any of your devices (phone, tablet, PC..).
- 4) Browser Sync: Create online accounts and settings will be available across devices.
- 5) **Dark Web**: Hackers can now scan a database of known/used passwords! This cuts down the time it takes to infiltrate a device. Bots operate 24/7.

Extend the life of your Devices

- 1) **Got Dust in your PC?** *Computers attract lots of dust* and **should be kept off the floor.**
 - a. An inexpensive solution is to put a couple of bricks underneath the chassis!
- 2) To increase the lifespan of your equipment, the inside of your computer should be checked for dust.
 - a. This should be done on average 2 times a year.
 - b. Take a picture of the back of your system and note all cabling.
 - c. Then take outside with a can of dust-off.
 - d. Generally, you need to remove 2 screws along the back edge and slide the cover off.
 - e. Using Dust-off, blast the inside, fans, power supply.
 - i. Inspect & pull off front casing, blast away any dust.
 - f. Dust-off can may get icy cold, wait a few minutes then continue.
 - g. When done, reverse order of steps to put PC case back together.
